Curriculum and institutional references

These are the institutional texts held in the syllabus system, reproduced exactly, with their sources and status. **None of them is a policy on how alignment is judged.** Where the system holds nothing, the entry says so.

No text in this package has been confirmed by the institution. Each entry carries one of these status labels:

Label	What it means
Synthetic: written for this review	Written to test the software. Not written by faculty, not institutional text and not taken from an approved syllabus. Judge it as written.
Transcribed: copied into the system, not confirmed by the institution	Copied into the syllabus system from an institutional document (a form, a syllabus or a registrar curriculum image). The responsible office has not confirmed the copy as current and approved.
Website copy: pending institutional approval	Copied from the university website. The institution has not confirmed it as the approved wording for syllabus checking.
Not held in the system	The system holds no text for this.

R-CASES · The review cases

Status: *Synthetic: written for this review*.

The course records (code, title, program, year level and discipline), the course descriptions, the program outcomes and the course and lesson outcomes in the review forms were written for this review, to test the software. They were not written by faculty and are not taken from approved syllabi. The graduate attributes in the cases are named as the system holds them (R-EGA), by full name or, in one case, by the short name the system also holds.

R-CODES · Course codes in the forms, checked against the curricula held in the system

Every curriculum transcribed in the system (BSIT 2022-2023, BSIE 2022-2023, BSCPE 2022-2023, BSIT-CYBERSECURITY 2025-2026) was searched for each course code used in the forms. A match shows only that the code appears in a transcription. It does not confirm the course descriptions or outcomes in the cases, which are synthetic.

Course in the forms	Program and year in the forms	In the curricula transcribed in the system	Status
MA 7 Differential Calculus	BSIE, year 1	BSIE 2022-2023: MA 7 DIFFERENTIAL CALCULUS (year 1, 1st semester) BSCPE 2022-2023: MA 7 DIFFERENTIAL CALCULUS (year 1, 1st semester)	Transcribed: copied into the system, not confirmed by the institution
IE 310 Operations Research	BSIE, year 3	Not found. The BSIE curriculum transcribed in the system has no course coded IE 310.	Not held in the system
IT 204 Computer Programming 2	BSIT, year 2	BSIT 2022-2023: IT-204 COMPUTER PROGRAMMING 2(INTERMEDIATE PROGRAMMING) (year 2, 2nd semester) BSIT-CYBERSECURITY 2025-2026: IT-204-QUANTITATIVE METHODS (INCLUDING MODELING AND SIMULATION) (year 2, 1st semester)	Transcribed: copied into the system, not confirmed by the institution
NCM 101 Fundamentals of Nursing Practice	BSN, year 1	No curriculum for BSN is held, so the code cannot be checked.	Not held in the system
EDUC 105 Assessment of Student Learning 1	BSEd, year 3	No curriculum for BSEd is held, so the code cannot be checked.	Not held in the system

Course in the forms	Program and year in the forms	In the curricula transcribed in the system	Status
ACCTG 201 Intermediate Accounting 1	BSA, year 2	No curriculum for BSA is held, so the code cannot be checked.	Not held in the system
HM 210 Food and Beverage Service	BSHM, year 2	No curriculum for BSHM is held, so the code cannot be checked.	Not held in the system

R-INST · Vision and mission

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `src/data/outcomesSeed.js`, which records that it was copied from the institutional form.

Vision.

Moved by the Spirit of the Risen Christ, La Consolacion University Philippines, rooted in Gospel values as a Catholic Augustinian-Marian institution, envisions to become a catalyst for the holistic transformation of all persons and communities.

Mission.

LCUP commits to generate and make available to all persons and communities' programs and services that will enable them to:

– exhibit academic and technical competence in their respective areas of discipline in the local and international environment;

– demonstrate their knowledge, critical thinking and creativity by exploring the various avenues of learning and searching for truth;

– manifest their willingness to serve specially the marginalized sector of our society;

– demonstrate productivity in various areas of learning as responsible citizens of the society; and

– live the Gospel values in the varied aspects of their personal and professional lives.

R-EGA · Expected graduate attributes

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `src/data/outcomesSeed.js` and `server/db/local-outcome-data.cjs`. **The system holds names only.** No description of any attribute is held (status: not held).

No.	Name	Short name
1	Critical and Creative thinker	Critical and Creative Thinker
2	Competent Catholic Augustinian-Marian Professional	Competent Professional
3	Socially Responsive Steward	Socially Responsive Steward
4	Transformative Lifelong learner	Transformative Lifelong Learner

R-VAL · Core values

Status: *Website copy: pending institutional approval*. Source: `server/config/marian-values.json`, copied from https://lcup.edu.ph/mission-vision.php (section CORE VALUES) on 2026-10-25. The file records its approval status as "pending approval": the wording has not been confirmed by the institution as the approved wording for syllabus checking, and findings that use it stay advisory until it is.

Value	Definition (website wording, not confirmed for this use)
Compassion	Compassion is love in action. It means going beyond sympathy and extending genuine care by understanding the feelings of others, recognizing their needs, and responding with kindness. Through compassion, we reflect God's love by becoming instruments of comfort and support to those who are most in need.
Courage	Courage is the strength to stand firm in truth and goodness. It is the freedom to express one's thoughts responsibly, the boldness to give and receive fraternal correction, and the integrity to choose what is right even when it is difficult or unpopular. Rooted in Gospel values, courage empowers us to live authentically and faithfully in service of God and others.
Community-orientedness	We believe in the power of unity. By fostering friendship, mutual trust, and respect, we build a community that is interdependent and socially responsive. This value challenges each of us to go beyond personal interests, working together with dedication and shared responsibility to achieve common goals that uplift both the University and society.
Humility	Humility allows us to see ourselves and others through the lens of truth and grace. It teaches us to acknowledge both our strengths and limitations, to welcome correction with openness, and to use every experience as an opportunity for growth. Above all, humility reminds us to be grateful to God who created each of us uniquely for a purpose greater than ourselves.
Interiority	Interiority is the practice of turning inward, encountering our true selves, and allowing God's presence to transform us. Through prayer, reflection, and contemplative silence, we confront our weaknesses and sinfulness, but also rediscover our dignity as children of God. This journey within leads us to an authentic relationship with Him and guides us to live with clarity and peace.
Missionary Spirit	A missionary spirit calls us to live beyond ourselves, reaching out to others with faith, hope, and love. It is the boldness to respond to the needs of the times, the willingness to witness Christ through our words and actions, and the passion to work for the common good. This spirit drives us to be agents of transformation in the world.

No source in the system attributes any of these values to an Augustinian or a Marian tradition.

R-BSIT · BS Information Technology

Program outcomes and their EGA mapping (the system's list)

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `src/data/outcomesSeed.js`, which records that it was copied from the institutional form.

About the EGA column. It is the mapping held in the system's list. The system does not record who adopted it or when, and the institution has not confirmed it. It is evidence of one list, not an approved mapping.

PO	Outcome	Mapped to EGA (not confirmed)
1	Apply computing and other knowledge domains to address realworld problems.	1 (Critical and Creative thinker)
2	Analyze complex problems and identify and define the computing requirements needed to design an appropriate solution.	1 (Critical and Creative thinker)
3	Design and develop computing solutions using a system-level perspective.	1 (Critical and Creative thinker)
4	Demonstrate ethical behavior as an IT Professional and sensitivity to the impact of technology in the society.	2 (Competent Catholic Augustinian-Marian Professional)

PO	Outcome	Mapped to EGA (not confirmed)
5	Show Augustinian virtues/ethical values and the understanding and appreciation of corporate social responsibility.	2 (Competent Catholic Augustinian-Marian Professional)
6	Work effectively and independently in multi-disciplinary and multi-cultural teams.	4 (Transformative Lifelong learner)
7	Understand the impact of their work on society and strive to ensure that their actions contribute positively on the community.	3 (Socially Responsive Steward)
8	Articulate and discuss the latest developments in the specific field of practice.	1 (Critical and Creative thinker); 4 (Transformative Lifelong learner)
9	Act in recognition of professional, social and ethical.	2 (Competent Catholic Augustinian-Marian Professional)
10	Demonstrate ethical leadership and social responsibility by integrating sustainability, inclusivity, mental well-being and peace-building principles into academic, professional and community engagements, ensuring holistic development and societal transformation.	3 (Socially Responsive Steward)

Program outcomes transcribed from the IT 202 syllabus

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `server/db/local-outcome-data.cjs`, from IT-202-Programming-1.pdf, pages 2 and 3.

- Note in the source: The nine PDF outcomes differ in count and numbering from the existing ten BSIT database outcomes; preserve the existing set rather than merge incompatible numbering.

PO	Outcome
1	Articulate and discuss the latest developments in the specific field of practice;
2	Effectively communicate orally and in writing using both English and Filipino;
3	Work effectively and independently in multi-disciplinary and multi-cultural teams;
4	Act in recognition of professional, social ethical responsibility;
5	Preserve and promote “Filipino historical and cultural heritage;
6	Analyze complex problems, and identify and define the computing requirements needed to design and appropriate solution;
7	Apply computing and other knowledge domains to address real-world problems;
8	Design and develop computing solutions using a system-level perspective;
9	Utilize modern computing tools.

The IT 204 syllabus template's course learning outcomes

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `src/data/outcomesSeed.js`, copied from a syllabus template labelled "corrected syllabus template (IT204-Programming2-EOMS)". The system does not record whether this template is the approved syllabus. The template also tags CLOs 2, 3 and 4 with PO 11 and PO 14, which are not in the BSIT list; those tags were left out when it was copied, for an administrator to decide.

CLO	Title	Level label	POs	EGAs	Statement
1	Foundational Knowledge	Introductory	1, 5	1, 4	Analyze and explain the fundamental concepts of object-oriented programming, including classes, objects, inheritance, polymorphism, encapsulation, and basic design patterns, using appropriate Java syntax and terminology.
2	Skill Development / Evaluate	Enabling	6	1, 4	Apply object-oriented design principles to develop Java programs using classes, subclasses, inheritance, interfaces, collection classes, iteration protocols, and APIs, and evaluate the correctness and efficiency of solutions.
3	Application / Create	Demonstrating	3, 7	1, 4	Design, implement, and test robust and maintainable Java programs that integrate OOP concepts, event handling, exception management, and fundamental design patterns to solve real-world engineering or computing problems.
4	Ethics & Responsibility / Evaluate & Create	Integration of Values	6, 8	2, 3	Demonstrate ethical, socially responsible, and collaborative programming practices by reflecting on the impact of software solutions on users and society, integrating Christo-centric Catholic and Marian–Augustinian values in teamwork, problem-solving, and code development.

The system does not define the level labels (Introductory, Enabling, Demonstrating, Integration of Values).

Curriculum

Status: *Transcribed: copied into the system, not confirmed by the institution*. `server/db/local-curriculum-data.cjs` describes itself as a "human-verified transcription" of the registrar curriculum images. The registrar has not confirmed it as the current approved curriculum.

R-BSIE · BS Industrial Engineering

Program outcomes transcribed from the IE 402 syllabus

Status: *Transcribed: copied into the system, not confirmed by the institution*. Source: `server/db/local-outcome-data.cjs`, from IE402-SYSTEM-ENGINEERINGS.pdf, pages 2, 3, 4.

- Note in the source: PO12 ends mid-sentence in the source; preserved without an invented completion.
- Note in the source: The source does not provide a standalone PO-to-EGA crosswalk.

PO	Outcome
1	Ability to apply knowledge of mathematics and science to solve complex engineering problems;
2	Ability to design and conduct experiments, as well as to analyze and interpret data;
3	Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability, in accordance with standards.
4	Ability to function on multidisciplinary teams
5	Ability to identify; formulate, and solve complex engineering problems;
6	Understanding of professional and ethical responsibility.
7	Ability to communicate effectively
8	Broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9	Recognition of the need for, and an ability to engage in life-long learning;
10	Knowledge of contemporary issues;
11	Ability to use techniques, skills and modern engineering tools necessary for engineering practice; and;
12	Knowledge and understanding of engineering and management principles as a member and leader in a team, to manage projects and in
13	Ability to design, develop, implement and improve integrated system that include people materials, implementation, equipment and energy.

Curriculum

R-NONE · Programs with nothing held

Status: *Not held in the system*.

The system holds no program outcomes, curriculum or syllabus for **BSN** (NCM 101), **BSEd** (EDUC 105), **BSA** (ACCTG 201) or **BSHM** (HM 210). Cases in these courses are judged from their texts and the reviewers' knowledge of the program. Whether official outcomes should be supplied is a pending institutional decision.
